FLOOR PROTECTION POSTER

Download our **FREE** digital poster today!

This free printable poster is intended to be displayed on jobsites, reminding all trades to safeguard the floor from damage since the existing concrete slab will be the finished floor surface.

Help keep your project on track and ensure a professional finish by prominently displaying this poster on your jobsite.

THOROUGH PLANNING AND COLLABORATION

Begin with meticulous planning, fully grasping the requirements and potential challenges of Type 1L concrete. Collaborate closely with all project stakeholders to ensure a smooth and successful project.

QUALITY CONTROL AND FLOOR PROTECTION

Emphasize strict quality control, documentation of mix designs and floor protection. Type 1L concrete tends to have a softer, more porous surface, making it more susceptible to scratches, staining, and other forms of damage.

EDUCATION AND COMMUNICATION

Ensure all stakeholders become well-versed in Type 1L concrete's properties. Maintain open communication between all parties to proactively address challenges and ensure project success.
